SUMMARY DESCRIPTION

Analytical and detail-oriented Data Analyst with over 5 years of experience in data analytics and 2+ years in data entry and administrative support. Proven expertise in managing sensitive information, maintaining database accuracy, and supporting documentation and reporting processes in fast-paced environments. Highly proficient in SQL, Python, Power BI, Tableau, and Microsoft Dynamics CRM. Adept at working independently in remote settings with a strong commitment to confidentiality, accuracy, and timely task completion.

WORK HISTORY

Data Entry Specialist

Surrey Place Centre – Toronto, ON
July 2023 – July 2024

- Maintained and updated the HCD-ISCIS Ontario Ministry database, ensuring accurate and timely entry of mandatory Early Years Program data.
- Performed regular data validation and verification to meet ministry compliance and reporting requirements.
- Identified and corrected missing or inaccurate records by running reports and cross-referencing multiple data sources.
- Supported electronic filing, document verification, and adherence to standardized naming conventions.
- Responded to internal inquiries and client requests using clear and professional communication.
- Prepared and reviewed documentation to ensure accuracy, completeness, and proper authorization.
- Managed incoming calls via a multi-line switchboard and provided client assistance.

IT Data Analyst

Crossworld Solutions Technologies Corporation – Toronto, ON
June 2018 – June 2023

- Designed and maintained ETL pipelines to automate and optimize data workflows across departments.
- Integrated cloud-based and legacy systems to enable seamless data flow for analytics and reporting.
- Developed and maintained Power BI dashboards to track KPIs and support decision-making.
- Conducted root cause analysis on data discrepancies and collaborated with cross-functional teams to resolve issues.
- Generated analytical and operational reports using Microsoft Dynamics CRM and other data sources.
